DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

Claims 47–49 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Examiner finds no “non-toxic to other taxonomic organisms “ however paraphrased. The statement as now claimed in the priority document, the originally filed claims or the specification, although as applicant points out, there is a general statement, not attributable specifically to the specific compounds used (page 11 of applicant’s arguments), & page 5 presents the example, without using an acaricide.

Positive statement in “consisting of “ mode is seen as the way to claim the INVENTION ; as now written,(claim 13) there is a requirement for a fungicide, but no preclusion of other toxic or otherwise pesticidal compounds. The composition incorporated into the fiber can have other components besides that consisting of an antifungal.

Claim Rejections - 35 USC § 103

Claim 13, 16-18, 20, 32, 35, 36, 38-46 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Kluft et al WO 97/24484 in view of Barton et al GB 2248774 and/or Lowes 3284395 and/or Morrison 3959556 and/or Cox GB 2309461.

Applicant's arguments filed 11/27/06 have been fully considered but they are not persuasive. Applicant's arguments have been considered in the maintained & re-inserted rejection; in essence applicant uses a general statement to support a requirement for non-toxic, and argues the cited art includes acaricides. However, acaricides are not precluded in the instant language, & the required antifungal is present. Thus, the artisan having the knowledge of doping fibers to provide pesticidal treatment would well know to produce the instant products, which would result in the instant claimed effects.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
